PROJECTS

SMART QR-BASED CHOCOLATE VENDING MACHINE
March 2024 – July 2024
- Role: Developed the web application using Flask (Python), enabling chocolate selection via a QR code-based interface.
- Tech Stacks: Python (Flask, pigpio), Razorpay Payment API, HTML, CSS. Hardware: Raspberry Pi, LCD Display, Servo Motors
- Description: Developed an interactive chocolate vending machine that uses a QR code for chocolate selection and purchase. The web application manages transactions and controls hardware components to dispense chocolates, integrating both software and hardware for a seamless vending experience.

QR BASED ATTENDANCE SYSTEM   june 2023 – Nov 2023
- Role: Developed the web application using HTML, CSS, JavaScript, PHP, and DBMS for QR code-based attendance management.
- Tech Stacks: HTML, CSS, JavaScript, PHP, DBMS
- Description: Created an attendance system that allows employees to mark attendance using a QR code. The system manages and stores attendance data securely in a database, simplifying attendance tracking.

DIGITAL CRAFT STUDIO WEBSITE   jan 2022 – Feb 2022
- Role: Designed the website for Digital Craft Studio to sell its handcrafted products online and showcase them.
- Tech Stacks: HTML, CSS, Bootstrap, JavaScript
- Description: This website comes with a friendly user interface and responsive design for better experience in shopping, using Bootstrap for layout and styling and JavaScript for interactivity.
